

REMARKS

Claims 1-6 are pending in the application.

As required for allowance, the formal matters of figure numbering and a second Figure of a flow chart have been added to both the drawings and the text of the specification.

The Abstract has been amended in response to the Examiner's objection to phraseology.

In view of the attached submissions, the above amendments, and remarks, it is believed that all formal matters have been addressed and that the application is in condition for full allowance. Such favorable action is respectfully solicited.

Respectfully submitted,

Date: 12/10/2003

Kathleen A. Ranney
